PROFESSIONAL EXPERIENCE

React Native Developer

724.ONE

Jan 2024 – Present | Lahore, Pakistan

Current Role – React Native Developer

- Developed and shipped 3+ cross-platform production apps using React Native, Firebase, Supabase, and Node.js — covering iOS and Android from architecture to store deployment.
- Reduced average API response handling time by ~35% through optimized caching strategies using TanStack Query and improved state management with Redux Toolkit.
- Led end-to-end App Store and Google Play releases for multiple apps, managing signing, build pipelines, and post-launch stability with zero critical rollback incidents.
- Collaborated with design and backend teams to deliver features on schedule, maintaining high code quality through peer reviews and modular component architecture.
- Integrated third-party services including Stripe, RevenueCat, Firebase FCM, Google Sign-In, and AdMob across multiple production apps.

AI-Home-Pro -- Smart Home Assistance

Nov 2025

AI Home Pro is a React Native mobile app that lets homeowners diagnose and fix household issues (HVAC, plumbing, electrical, and appliances) by submitting a photo and description to an AI assistant powered by OpenAI via Firebase Cloud Functions.

When the AI can't resolve the issue, users can escalate to a live expert, save solutions for future reference, and access subscription-based repair guides — all in one app.

Technologies: React Native, Firebase (Firestore, Realtime Database, Auth, Cloud Functions, Storage, FCM), OpenAI API (GPT-4o Vision), Redux, GiftedChat, RevenueCat, AdMob (Google Mobile Ads)
